

Fingerprint Enrollment Device FP-S200

make enrollment process easy....

Synel's fingerprint enrollment device FP-S200 is a high performance USB fingerprint reader for efficient fingerprint authentication for use with biometric supported fingerprint products (FPU-S).

The module enables enrollment to various Synel systems such as: Syncomm, TimeLOG and Falcon, in an easy and convenient manner.

The user receives an immediate indication of the template quality and watches the received image instantly, and so can make a decision whether to Save the template or to make an additional sampling.

The created template is suitable for all sensors types of module FPU-S.

The device's ergonomic shape assists in a fast and easy template sampling.

Features

- Reliable image quality of 500 dpi
- Hard and strong sensor surface
- Standard USB interface support
- Plug and play installation
- Windows 98, Me, 2000, XP support
- Outstanding authentication performance

Specifications

Fingerprint sensor: Optical
 Resolution: 500dpi / 256 gray
 Imaging area: 16 x 9 mm
 Interface: USB 1.1 full speed
 Operation temperature: 0~40°C
 Dimension (WxLxH): 68 x 120 x 37 mm

Functions

- | | |
|--------------------|----------------------|
| • Enroll | Directly supporting: |
| • Verify (1:1) | • Syncomm 5/508 |
| • Identify (1:N) | • TimeLOG Ver. 9 |
| • Capture to Image | • Falcon 2.23 |
